| Bottle weight | 2 oz/0.06kg |

# CARRY

## 1 SUSPENSION

- + Fiberglass peripheral frame effectively transfers load from harness to hipbelt\*
  - + Atilon framesheet spreads load across the backpanel to the peripheral frame
- \*44L/40L only

## 2 AIRSCAPE™ BACKPANEL

- + Precision cut and accordion spread mesh-covered foam ridges
- + Lightweight and comfortable contact surfaces

## 3 BIOSTRETCH™ HARNESS

- + Mesh-covered, die-cut slotted foam harness
- + Slotted adjustable sternum strap with whistle buckle
- + Stretch woven harness pocket(s)

## 4 BIOSTRETCH™ BUILT-IN HIPBELT

- + Mesh-covered, die-cut slotted foam hipbelt
- + Zippered stretch mesh hipbelt pockets
- + ErgoPull™ hipbelt closure with hipbelts directly connect to backpanel mesh
- + Seamless lumbar to hipbelt body wrap

# SIZING / FIT

### TALON - MEN'S SIZING

S/M	16-20" / 41-51 cm
M/L	19-23" / 48-58 cm

### TEMPEST - WOMEN'S SIZING

WXS/S	13-17" / 33-43 cm
WS/M	16-20" / 41-51 cm

### WOMEN'S SPECIFIC FIT

- + The unique suspended mesh located on the shoulders, backpanel, lumbar and hipbelt contour to a wide variety of body shapes and sizes to create a custom fit to your body.
- + The pack shape is narrower and deeper, allowing greater freedom of movement and increases stabilization by lowering the position of the load to a woman's center of gravity.
- + The shoulder harness is designed with different curves to create an anatomical fit for a woman's neck, shoulders and chest.
- + Women's hips are conically shaped with a larger difference between the waist and hip measurements. The hipbelts are shaped and angled to accommodate this difference, which allows a more comfortable load transfer and support.

### HARNESS FIT

The harness straps should wrap fully around your shoulders with no gaps between the pack and your back. The padded part of the harness straps should end 1 1/2" / 2.5 cm - 2" / 5 cm below the armpits and the sternum strap adjusted to approximately 2" / 5 cm below the collarbone.

# FEATURE DETAILS

## HARNESS ADJUSTMENT

44L / 40L / 33L / 30L / 22L / 20L

Loosen load lifter straps at the top of the harness, slide hand between backpanel and harness to release hook and loop attachment and slide harness into position using arrows to guide. Firmly press on backpanel to reengage hook and loop attachment.

## STOW-ON-THE-GO™ TREKKING POLE ATTACHMENT

44L / 40L / 33L / 30L / 22L / 20L / 11L / 9L

Osprey's Stow-on-the-Go™ trekking pole attachment is designed to quickly attach and carry trekking poles while wearing a pack.

- Locate the elasticized loop on the lower left side of pack. While pulling the loop out from the pack, insert the basket end of the trekking poles into the loop.
- On the left harness strap locate the trekking pole icon. Pull up on the cord to open, place pole handles in the loop and tighten with the cord lock to secure.
- Reverse these steps to remove the trekking poles.

## LOWER INSIDEOUT™ COMPRESSION / CARRY STRAPS

44L / 40L / 33L / 30L / 22L / 20L / 11L / 9L

InsideOut™ Compression straps compress pack when not full to ensure stable carry and secure items in side pockets. They can be routed inside or outside of the side mesh pockets:

- Locate duckbill buckle at the top and side of each side pocket and unthread the webbing.
- Route the webbing by positioning the slider buckle inside or outside of the side pocket and reverse the process.

## EXTERNAL RESERVOIR SLEEVE

44L / 40L / 33L / 30L / 22L / 20L / 11L / 9L

External reservoir sleeve located behind the shoulder harness, allows for easy loading/unloading of a hydration reservoir. Place reservoir inside the sleeve to help provide proper weight distribution. Clip reservoir to buckled loop to keep upright.

## SIDE STRETCH MESH POCKETS

44L / 40L / 33L / 30L / 22L / 20L / 11L / 9L

Stretch mesh pockets on both sides of pack provide convenient storage for smaller items.

## DUAL AND SINGLE ICE TOOL LOOPS

44L / 40L / 33L / 30L / 22L / 20L

Dual and single ice tool loops provide secure storage for mountaineering axes and ice tools.

- Slide the tool shaft through the top of the ice tool loop and flip the shaft up toward the top of the pack.
- Loose the bungee cord lock and route the tool handle through the bungee. Tighten the cord lock nesting it into the Y-clip to secure the tool into place.
- Reverse to remove.

## LIDLOCK™

22L / 20L / 11L / 9L

To use LidLock™ helmet attachment, locate LidLock™ clip on top front panel of pack, pull clip away from pack, pass through helmet vent and secure in horizontal position. The cord located on the inside of the pack is used to increase or decrease tension as needed. Reverse to remove helmet.
